Ascent in the Himalayas

Throughout history, Asia's towering peaks, from Everest to K2, have been a crucible for scientific exploration. Notable ascents, like the first conquest of Mount Everest in 1953, exemplify the human quest for extraordinary heights, showcasing the intersection of adventure and scientific discovery in the face of formidable challenges.

9,7 %
of Himalayan mountaineers are women

Junko Tabèi, first woman to summit Everest in 1975
